

## **Microsoft Dynamics Point of Sale/RMS Gas Pump Interface to be installed in Louisiana site**

### **International Press Release**

Date: July 12, 2010

Media Release – RMS Solutions Inc.  
FOR IMMEDIATE RELEASE

RMS Solutions Inc., Factor One Technology Inc. and Microsoft Authorized Reseller, Capital Point of Sale are pleased to announce that their integrated Point-of-Sale solution is to be installed at the initial site in the State of Louisiana.

The solution combines the Microsoft ® Dynamics Point-of-Sale (POS) Retail Management System and the RMS Gas Pump Interface (GPI) to create a powerful and easy to use fully integrated solution. It benefits convenience stores and gas bars using the Microsoft ® Dynamics Point-of-Sale (POS) Retail Management System by giving them effective management of fuel sales and costly fuel stock (inventories).

Those familiar with the Microsoft ® Dynamics Point-of-Sale (POS) Retail Management System will be pleased to know that the RMS GPI is PA-DSS (PCI) compliant for customers in the USA. As well it meets US EPA standards for reporting and history of site operations. The solution can handle Pay-at-the-Pump (PAP), fleet cards, private loyalty programs, price signs, car washes and tank monitors. It is a flexible, scalable, solution that can be used in environments from single convenience stores to large enterprises with hundreds or even thousands of site locations.

Installation will be handled by Capital Point of Sale of Prairieville, Louisiana, at the initial site in the Baton Rouge area which has a total of 10 fuel dispensers and will provide fast pay-at-the-pump convenience for customers.

Capital Point of Sale is a Microsoft Certified Professional company that provides retail, restaurant and multi-store POS systems based on the Microsoft Dynamics line of POS software. "We needed fuel management for our client and we were impressed with the proven package developed by Factor One and RMS, which combines a reliable fuel management solution with Microsoft's range of products. The very competitive price was a definite plus as well," said Capital's Dewaine Parker. "Buying this package has saved us months of development work and thousands of dollars in costs, a saving we can pass on to our clients now and in the future."

Jason Deyholos, President of Factor One, said "Adding the ability to manage fuel sales gives us an excellent opportunity to address a critical need faced by retailers selling fuel. We can now give them superior control of their fuel sales and inventory without increasing staff. We are proud to be able to make this available through the Microsoft Partner network. Our previous clients have been very pleased with the speed and reliability of the POS system with the RMS Gas Pump Interface. It is easy to learn and use, and with the touch screens store staff can give great service to large numbers of customers."

Thomas Viccars, President of RMS, said "We are excited by the potential that will follow this initial installation in the State of Louisiana and we look forward to a long association with Factor One and the world-wide Microsoft Dynamics reseller community. We can point to retailers who have seen the benefits of fuel management and control. These retailers can also look forward to higher margins and reduced costs due to the accurate and complete information available from the integrated solution." He added "Our

experience has shown that retailers are looking for a solution that is not 'in a box' but can be enhanced and updated without having to throw out the old system and the loss of capital (dollars) in doing so – ROI is a mandatory consideration in these economic conditions."

In the coming months RMS will be working closely with Factor One, Capital Point of Sale and many other Microsoft Dynamics Partners to roll out the integrated solution across North America and around the world.
